Wind Speed, Temperature, Relative Humidity, Moisture Content, Dew Point, Station Pressure, Barometric Pressure, Air Density, Relative Air Density, Density Altitude, Altitude, Wind Chill, Heat Index, Wet Bulb Temperature, Time and Date, Data Logging.

The Kestrel 4250 can measure it all

Kestrel 4250 Racing Weather Tracker

The Kestrel 4250 Racing Weather Tracker has been designed specifically for those on the motor racing track. It is a portable weather monitoring station providing up to date, accurate environmental information at the trackside, where it counts.

The Kestrel 4250 allows you to take instant accurate readings of environmental conditions to help make those last minute dial-in or tuning decisions. At the touch of a button important information can be clearly displayed in either a digital or graphical format.

"In a sport where density altitude and wind speed can greatly influence a car's performance, the Kestrel has made dialing my car a breeze. Once I learned to trust the readings, it was amazing how predictable my car was."
- Bill Barr, Veteran Bracket Racer

The Kestrel 4250 offers a multitude of features to help you monitor your environment in one single instrument. Specially developed for motor racers, it provides key measurements of air density, station pressure, humidity ratio, density altitude and water grains.

REAL TIME DATA

View current data in a choice of standard formats or user defined screens.

Graphical

Minimum / Average / Maximum

HUMIDITY %	
Min	5.7
Avg	35.8
Max	42.6

DATA LOGGING

Log data automatically (or manually) at programmable intervals, in order to display historical weather information. Up to 2000 data points can be stored including the value, time and date of capture.

Gordon Cole uses Kestrel 4250 to dial in at the track

The Kestrel PC Interface with Communicator Software can be used to upload data from your Kestrel 4250 Racing Weather Tracker to

your PC. This enables long-term storage of data, further analysis, detailed charting and comparisons with other data collected at the track.

Affordable, Accurate and Rugged
